

presents When Good Blenders Go Bad... The Out of Warranty Repair Program!

McDantim, Inc. takes pride in manufacturing a reliable, accurate Blender that lasts for years beyond our warranty. All Beverage Line Models (TM-1, TM-1HF, TM-2 and TM-2HF) come with a Five Year Limited Warranty which covers out of specification gas blends and leaks. (Blenders filled with contaminants are not covered under our warranty.)

Here is our **Out of Warranty Repair Program**. These prices are not based on our distributor level pricing and are the same to end-users. Note: **McDantim** does its best at confirming ownership of the Blender before performing repairs.

Regulator assemblies are still available for purchase for both the old black plastic and white powder coated panels.
