Increase cut speeds,
quality, and accuracy
while laser cutting with
McDantim's **Trumix®**
LaserCut panel.

O₂/N₂ Blends

TMLASERCUT

McDantim®
GAS BLENDING TECHNOLOGIES

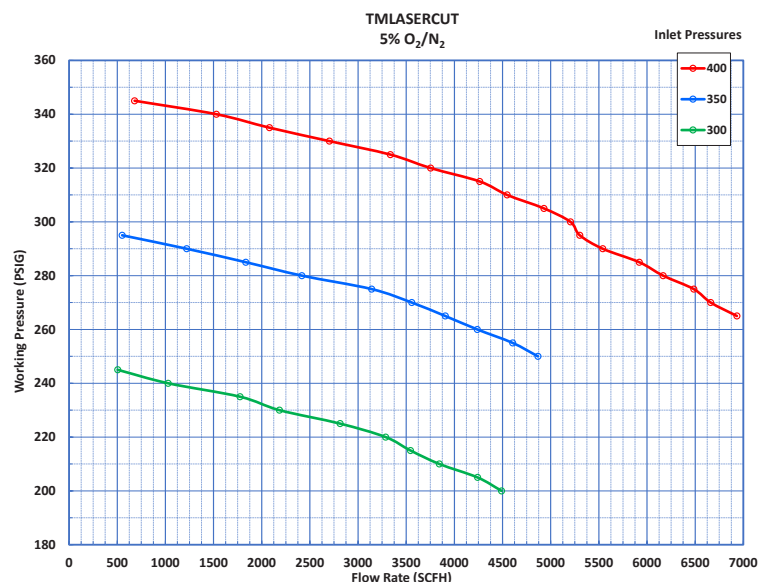

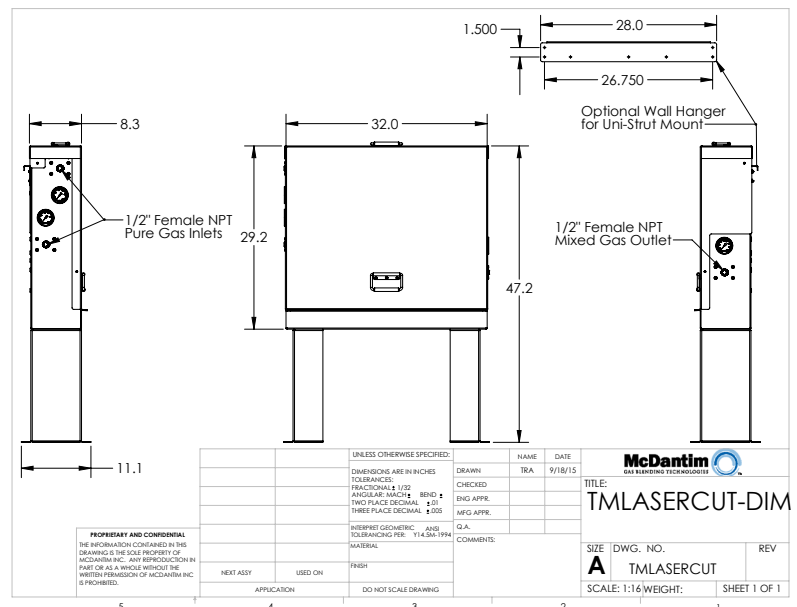

W E L D

TMLASERCUT Benefits

- O₂ / N₂ Blends
- High Pressure
- High Flow
- High Accuracy
- Increased Cut Speed
- No Electricity Required
- No Storage Tank
- Low Maintenance
- Reduce or Eliminate Dross

McDantim's trusted Trumix® technology is available for the laser cutting industry!

This panel is a floor-mounted unit, but can be wall-mounted. The Lasercut comes standard with coalescing filters and a piloted regulator system, as well as easily removable blender banks for blend changes or recalibration. See the flow chart for scfh and working pressure correlation and capacity.
